

Shops at the Mall

NAME _____

Complete the first section of the activity sheet individually.

1. You are planning to lease space for a new mall that has one million square feet of leasable space. Determine how much space you would allocate for each type of specialty shop by completing the table below.

TYPE OF SHOP	PERCENT OF MALL	ALLOCATED LEASABLE SPACE
Women's clothing	25	
Men's clothing	10	
Food	15	
Service	5	
Shoes	10	
Jewelry	3	
Family Items	7	
Gifts	17	

2. Using the guidelines, about how much of the mall's space would not be leased?

What would you do with the remaining space? Discuss your decision here.

Making a Scale Drawing

Work with your group to complete the following activity.

3. Make a scale drawing of your mall, showing how you will allocate leasable space. Be prepared to share your drawing with the rest of your class. Consider the following:
 - Some stores will be bigger than others.
 - Stores competing for the same business must not be located next to each other.
 - A written or visual plan for dealing with traffic flow (walking) in the mall must be included.
 - A mall will have two stories, and both floors must be included in your drawing.
 - A food court should be located on the mall's second floor.
